The above estimates are based on the following assumptions:

1. That the policies for air shipment will remain the same as
are in effect at the present time. *a. In relation to items air shipped*
b. In relation to use of this facilities for
air lift

2. That the increase in workload will continue at the rate that
has been evidenced in the first six months of 1951.

~~Based on these factors, the percentages are~~

3. Base point for plotting
curve is outbreak of
hostilities in Korea.

4.

Projected operations will
continue based on no
change in world situation
